

**Model 6800**  
**Lever-Action Coupler**  
**Simplifies Lubrication Tasks**

**New Lever-Action Design**

Alemite's Model 6800 Lever-Action Coupler makes quick work of equipment lubrication. It is easily attached and removed from the grease fitting by the simple operation of the lever. Its superior seal minimizes grease loss between the coupler and the fitting head. All-steel construction provides maximum durability and service life while the rubber sleeve protects the hose from wear.

Featuring one-handed operation, the coupler conveniently remains attached to the fitting without being held in place, if necessary. The Model 6800 grease coupler is suitable for use in vehicle service applications, as well as in agriculture, construction and general industry.

**Lever-Action Coupler Benefits:**

- Easy attachment and removal from fitting
- Minimizes grease loss between coupler and fitting head
- One-handed operation; coupler remains attached without holding it in place
- Ergonomic lever design with comfortable grip
- Sturdy, all-steel construction with spring-steel jaws
- Durable, nylon protective sleeve prevents hose wear
- Less waste for lower lubricant costs
- Superior sealing
- Increased productivity
